

Infrastructure as Code With Terraform

WORKSHOP

3-tier AWS Application

Build a production-grade 3-tier AWS architecture with Terraform — hands-on, from scratch.

Presented By:

Kuseh Simon Wewoliamo

Date: 6 June 2026

Workshop Overview

- ▶ Production-structured Terraform project
- ▶ AWS 3-tier architecture
- ▶ Reusable Terraform codebase
- ▶ EC2 + RDS deployment
- ▶ GitHub-ready project

Prerequisites & Environment Setup

- ▶ Terraform Installed
- ▶ AWS Account
- ▶ AWS CLI Installed and Configured
- ▶ Git Installed
- ▶ GitHub account
- ▶ Code Editor: VS Code

Architecture Diagram

3-TIER AWS APPLICATION ARCHITECTURE

Highly Available, Scalable, and Secure

High Availability
Multi-AZ Architecture

Scalability
Scale Independently

Security
Isolated Subnets & Security Groups

Data Durability
RDS Multi-AZ Replication

Performance
Optimized for Production
